

PERARULALAN V LLM Engineer & Backend Developer Trichy 6385274522 perarulalan01@gmail.com perarulalan.vercel.app perarulalan-v perarulalan15			
Summary	Engineer skilled in LLMs, NLP and Backend development . Experienced in building AI-powered applications, long-context pipelines, and Spring Boot–based backend systems. Strong foundation in Java, Python, PyTorch and Transformers . Passionate about designing real-world solutions by combining AI intelligence with robust engineering.		
Skills	Programming	AI / NLP / LLMs	Backend Development
	Python, Java	Transformers, PyTorch, LangChain, Embeddings, RAG, Vector Search	Spring Boot, REST API
Databases		Tools	
PostgreSQL		Git, Github, Postman	
Internship	Propeller Technologies ML Intern Propeller Technologies - Developed computer vision models, including YOLOv8 and Faster R-CNN, achieving 95% accuracy in detecting lumpy skin disease in cows, enhancing early disease intervention. - Engineered and implemented models for insect classification and detection, optimizing accuracy through large-scale data processing and model training. - Collected, annotated, and augmented extensive datasets, applying advanced data preprocessing techniques to improve model robustness and performance.		May 2024 - July 2024 Trichy
Projects	Flashlearn - Intelligent Learning with AI-Generated Flashcards Django, PyTorch, Transformers, NLP Flashlearn - Built a complete AI study assistant that converts PDFs/books into summaries and flashcards. - Implemented chapter-wise extraction, auto TOC generation, and high-quality summarization. - Enabled fast conceptual revision with efficient NLP modules.		April 2025
	Chaterly - Personalized Chatbot Chainlit, Llama3-8B, Groq API chaterly - Created a chatbot with multiple conversational personalities. - Integrated Groq’s Llama3-8B for ultra-low latency inference. - Implemented context retention and personality-based prompt routing.		June 2024
	SecureBank – Scalable Banking Backend System Java, Spring Boot, JPA, PostgreSQL - Designed a secure banking system: accounts, deposits, withdrawals, and transaction history. - Built clean, layered REST APIs with strong separation of concerns. - Optimized SQL queries and indexing for fast transaction processing.		
Education	Saranathan College Of Engineering, Trichy Artificial Intelligence and Data Science CGPA : 8.01/10.0		November 2021 - April 2025 B.Tech
Achievements	Solved 200+ problems on LeetCode
